INTRODUCING THE **ALL-NEW**
DC72E1

Goalrilla **DC**

A RESIDENTIAL SYSTEM. AN OUTDOOR INSTITUTIONAL SYSTEM.
EITHER WAY YOU LOOK AT IT - IT'S THE TOUGHEST GOALRILLA EVER BUILT.

DIRECT CONNECT TECHNOLOGY

All forces from the rim are transferred via a **DIRECT CONNECTION** to a **4" STEEL BEAM** - bypassing the backboard and its frame. It's Goalrilla tough - beyond the strength needed for the most brutal play.

The **GOALRILLA DC** can support **2,000 lbs. (1 Ton)**

THAT'S 6 STAINLESS STEEL REFRIGERATORS.

FOUND EXCLUSIVELY ON THE NEW

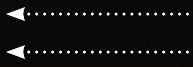

Goalrilla **DC**

● Most adjustable basketball goals pivot where rim and backboard meet the backboard arms. This causes forces on the rim to be directly transferred to the backboard frame and glass.

● The Goalrilla DC eliminates this pivot point, and instead transfers all forces to a solid cage supported by double-welded crossbeams via a 4" steel beam.

The DC72E1 features **DUAL WELDED TORSION BARS** on its lower board arms to prevent backboard sway.
